

# Atgard® Swine Wormer

## Broad Spectrum Swine Anthelmintic

### Description

Atgard® is a broad spectrum swine anthelmintic (dewormer) in the form of non-digestible, rice shaped resin pellets impregnated with the active ingredient dichlorvos.

### Features

Broad spectrum swine anthelmintic.

No withdrawal.

Slow release formulation provides superior efficacy & wide margin of safety.

### Benefits

Highly effective.

Economical.

Recommended for swine of all ages including pregnant sows.

### Advantages

Requires no fasting or withdrawal of drinking water.

No withdrawal time.

### Dosage & Administration

See dosage table on back of this reference page.

### Precautions

**Do not** use in animals other than swine.

**Do not** mix in feeds to be pelleted nor with pelleted feed.

**Do not** allow fowl access to this feed or to feces from treated animals.

**Do not** soak feed or feed as wet mash. Feed must be fed dry.

Dichlorvos is a cholinesterase inhibitor.

**Do not** reuse any of the containers or container materials used in packaging (product).

### Uses

Atgard Swine Wormer is a highly effective anthelmintic recommended for the removal and control of the sexually mature (adult), sexually immature, and/or 4th stage larvae of the whipworm (*Trichuris suis*), nodular worms (*Oesophagostomum* spp.), large roundworm (*Ascaris suum*), and the mature thick stomach worm (*Ascarops strongylina*) occurring in the lumen of the gastrointestinal tract of pigs, boars, and open or bred gilts and sows.

### Warning

Avoid contact with the skin. Keep out of reach of children. If human or animal poisoning should occur, immediately consult a physician or veterinarian, respectively. Atropine is antidotal.

### Highlights

- Broad spectrum & highly effective.
- Economical.
- Easy to use.
- No withdrawal time.
- Recommended for swine of all ages.

### Product Information

Name	Code	Size
Atgard® Swine Wormer	610-711	54.6 gm packet

### Use Directions

ATGARD Swine Wormer is designed to be administered in dry meal or crumble-type rations. The user should acquaint himself thoroughly with the contents of the package insert.

### Pig Dosage Table

Pig Weight (lbs)	Number of Pigs/Package	Pounds Feed/Package	Pounds Feed/Pig
20-30	60	20	0.33
31-40	45	25	0.56
41-60	30	30	1.00
61-80	25	25	1.00
81-100	20	20	1.00
Adult Gilts, Sows, Boars	20	80	4.00

The preparation should be added to the indicated amount of feed and mixed thoroughly on a clean, impervious surface. Administer medicated feed shortly after mixing. Do not allow swine access to feed other than that containing the preparation until treatment is complete. Resume normal feeding schedule afterwards. Preconditioning or fasting pigs overnight is not necessary or recommended. Do not treat pigs with signs of scours until these signs subside or are alleviated by proper medication. Pigs of varying body weights should be regrouped into similar weight classes before treatment. Consult your veterinarian for assistance in the diagnosis, treatment and control of parasitism.

### Warning

Do not store unused packet(s) contents or medicated feed. Unused contents and feed containing ATGARD Swine Wormer should be buried 18 inches deep in the ground and covered in a manner rendering it unavailable to man, animals, or fowl. Avoid contact with the skin. Keep out of reach of children. Do not use in animals other than swine. Do not allow fowl access to feed containing this preparation or to manure from treated animals. ATGARD Swine Wormer (dichlorvos) is a cholinesterase inhibitor. Do not use this product on animals simultaneously or within a few days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides or chemicals. If human or animal poisoning should occur, immediately consult a physician or a veterinarian, respectively. Atropine is antidotal. ATGARD® is a Registered Trademark of Boehringer Ingelheim Vetmedica, Inc.
