For the Treatment of Infections and Infestations Due to Internal and External Parasites of Beef and Dairy Cattle

Contains 5 mg moxidectin/mL

Treats 20 550 lb cattle

Dosage: CYDECTIN (moxidectin) Pour-On is a ready-to-use topical formulation intended for direct application to the hair and skin in a narrow strip extending along the top of the back from the withers to the tailhead. Due to the angular topline characteristic of most dairy breeds, it is recommended that all pour-on products be applied slowly to dairy cows. Apply to healthy skin avoiding any mange scabs, skin lesions, mud or manure. Treated cattle can be easily recognized by the characteristic purple color, which will remain for a short period of time after treatment. The recommended rate of administration is 1 ml for each 22 lb (10 kg) body weight which provides 0.5 mg moxidectin for each 2.2 lb (5.0 mg/kg) body weight. The table below will assist in the calculation of the appropriate volume of pour-on which must be applied based on the weight of animal being treated.

Precautions: For external use only. Do not apply to areas of skin with mange scabs, skin lesions, mud or manure. CYDECTIN Pour-On is not recommended for use in species other than cattle. This product has been formulated specifically for topical use in cattle and should not be used in other animal species or by other routes of administration as adverse reactions may occur.

Environmental Safety: Studies indicate that moxidectin persists in soil for 21 and 28 days posttreatment. Avoid application to areas near drains or streams. Free moxidectin may adversely affect fish and certain aquatic organisms. Do not contaminate water by direct application or by improper disposal of drug containers.

Storage: Store product at or below room temperature. Avoid prolonged exposure above 25°C (77°F). If product becomes frozen, thaw completely and shake prior to use.

Disposal: Dispose of containers in an approved landfill or by incineration. See side to side label number and expiration date.

For the Treatment of Infections and Infestations Due to Internal and External Parasites of Beef and Dairy Cattle

Contents 500 mL

U.S. Patent No. 6,514,951
Restricted Drug (CA) - Use Only As Directed
