Item #: 421503
SAP #: 106661-001

Exp. Date:

Serial No.:

Indications: Recommended for the vaccination of healthy, susceptible sheep and cattle as an aid in the reduction of enterotoxemia caused by the toxins of *Cl. perfringens* Types C and D. Although *Cl. perfringens* Type B is not a significant problem in the USA, the combination of *Cl. perfringens* Types C and D fractions may protect against enterotoxemia caused by *Cl. perfringens* Type B.

Dosage: Using aseptic technique, inject 2 mL subcutaneously. Repeat in 21 to 28 days and once annually.

Precautions: Store out of direct sunlight at a temperature

Clostridium Perfringens Types C&D Toxoid

Caliber® 3

250 Doses/500 mL

between 35–45°F (2–7°C). Avoid freezing. Shake well before using. Use entire contents when first opened. Do not vaccinate within 21 days before slaughter. Anaphylactoid reactions may occur.

Antidote: Epinephrine.
