

**Indications:** For vaccination of healthy, susceptible swine 3 weeks of age or older as an aid in the prevention of lymphoid depletion, inflammation and colonization of lymphoid tissue associated with Porcine Circovirus Type 2 (PCV2), as an aid in the reduction of disease caused by *Mycoplasma hyopneumoniae*, and as an aid in the reduction of respiratory disease associated with Porcine Reproductive and Respiratory Syndrome virus. Indicated for use in PRRS virus positive herds only.

**Directions:** Shake each bottle of liquid product before use. Aseptically mix the full contents of the liquid vaccines as per the mixing instruction diagram; see back side of this carton. Rehydrate the lyophilized PRRS MLV 3 vaccine by aseptically transferring the full contents of mixed liquid products, as per the diagram. Shake well and use immediately. Use entire contents when first opened. Rehydrate only with the accompanying vaccines, do not mix other materials.

**Dosage:** Using aseptic technique, inject a single 2 mL dose of vaccine intramuscularly.

## Porcine Reproductive & Respiratory Syndrome-Circovirus Vaccine

Reproductive & Respiratory Form, Type 2,  
Modified Live Virus, Killed Baculovirus Vector

## Mycoplasma Hyopneumoniae Bacterin

3FLEX®

50 Doses HSB

Mix to 100 mL

**Precautions:** Store at 35-45°F (2-7°C). Do not freeze. Use entire contents when first opened. Do not vaccinate within 21 days before slaughter. Do not vaccinate breeding age boars. PRRS vaccine virus may be shed and transmitted to other populations of swine which are in contact with vaccinated swine. The duration of potential vaccine virus transmission may vary. Burn containers and all unused contents. In case of anaphylactic reaction, epinephrine is the symptomatic treatment.

**Preservative:** Neomycin.

This package contains one 50 dose (50 mL) vial of Ingelvac CircoFLEX® 1, one 50 dose (50 mL) vial of Ingelvac MycoFLEX® 2, and one 50 dose (100 mL) vial of Ingelvac PRRS® MLV 3. The Ingelvac MycoFLEX 2 is supplied in a headspace bottle (HSB) with extra capacity for the purpose of aseptic mixing.
