

Diaque™

Nutritional Supplement for Calves

Description

Diaque™ is a nutritional supplement providing a source of energy and electrolytes for young animals.

It is a unique formula containing a patented hydrophobic citrus fiber. Diaque has a unique, three-step buffering system that allows it to be fed with milk.

Features

Contains a patented hydrophobic citrus fiber
Highly palatable and convenient, it can be fed with milk, milk replacer, or warm water
Excellent source of energy
Contains a balanced electrolyte formula
Available in an easy-to-use 3.5 oz packet or bulk pails
Easy to mix and clean up
Stays in solution

Benefits

Unique patented hydrophobic, lecithin-coated fibers allow for flexibility in timing of administration.
High palatability promotes eating in highly stressed calves.
Convenient to feed; may be mixed with warm water, milk or milk replacer.
Readily available source of energy for times of stress.
Balanced electrolytes contribute to overall good health.
Available in a variety of convenient package sizes to fit your operation.
Readily dissolves in the recommended fluids saving time in mixing and clean up.
Stays in solution allowing the animal to receive the recommended dose.

Advantages

Diaque is a unique, patented formulation providing a source of supplemental electrolytes and energy that delivers a nutritional boost to calves and other species during times of stress.

Dosages and Administration

Calves: For oral use only. Mix packet (100 g) of Diaque in 2 quarts (1,891 mL) of warm water, milk, or milk replacer. Feed immediately. For larger calves or those requiring more energy, mix 1½ packets (150 g) Diaque in 3 quarts (2,837 mL) of warm water, milk, or milk replacer. Feed every 8 to 10 hours for 24 hours to 48 hours. Discard any unconsumed mixed product each day.

Lambs, Kids and Crias: Remove from dam. Feed Diaque twice daily for 2 days. Each feeding for a 10 lb animal should consist of 1 tablespoon (10 g) of Diaque mixed in ½ pint (236 mL) of warm water.

Feed using a bottle. Adjust amounts for larger or smaller animals.

Pigs: Mix 1 packet (100 g) of Diaque in 2 quarts (1891 mL) of warm water for a litter of 8 pigs. Feed in 4 feedings per day from a pan. Discard any remaining portion at each feeding. Normal feeding is for 2 days.

Foals: Mix 1 packet (100 g) of Diaque in 2 quarts (1891 mL) of warm water. Feed this amount to foal twice daily. May be fed with bucket or bottle. Amount recommended is for a 110 lb foal. Adjust for larger or smaller animals. Normal feeding is for 2 days.

Caution

For animal use only. Keep out of reach of children. Store in a dry place below 86° F (30° C).

Uses

Diaque may be fed to calves and other animal species, after mixing with milk, milk replacer, or warm water, as a source of supplemental electrolytes and energy. Diaque is an oral product that may be used in times of stress due to changes in feed, environment, or the digestive system.

Product Information

Name	Code	Size
Diaque™	434211000	12 x 100 gm
	434221000	24 x 100 gm
	434231000	6.6 lb
	434241000	22 lb
	434251000	55 lb

Highlights

- Compatible with milk, milk replacer, and warm water
- Provides for flexibility in timing of administration
- Excellent palatability encourages animals to eat
- Readily available source of energy
- Balanced electrolytes contribute to overall good health
- Labeled for use in calves and other animal species
- Available in a variety of convenient package sizes
