Ingelvac® ERY-ALC
Erysipelothrix Rhusiopathiae Vaccine
Live Culture, Frozen Form

Description
Ingelvac® ERY-ALC is a safe, effective, one dose, live Erysipelothrix rhusiopathiae (erysipelas) vaccine. It is administered orally.

Features
Safe for pigs 8 weeks of age or older.
Single dose administration.
Easy to use, oral administration via the drinking water.
Avirulent live culture vaccine.

Benefits
Long duration of immunity – 128 days.
Aids in prevention of erysipelas.

Advantages
Convenient water delivery results in less animal stress.
Simple oral vaccination reduces the need for injections.
Less exposure to needles results in improved pork quality and worker safety.

Dosage & Administration
Administer 1 dose in the drinking water to each pig.
Thaw contents of vaccine bottle by placing bottle in trickling cool water bath until liquid (usually 60 minutes).
Shake well and use entire contents immediately.
See product insert for complete directions.

Precautions
Store at -70°C.
Do not thaw until immediately prior to use.
Use entire contents immediately after thawing.
Do not refreeze.
In case of anaphylactoid reactions, epinephrine is symptomatic treatment.

Uses
Ingelvac® ERY-ALC is recommended for the vaccination of healthy, susceptible swine 8 weeks of age or older as an aid in the prevention of disease caused by Erysipelothrix rhusiopathiae (erysipelas).
Can be used in conjunction with Reload Pack™.

Warning
For veterinary use only.
Do not vaccinate within 21 days of slaughter.
Do not use in pregnant swine or breeding boars.
Do not use concurrently with antibiotics.
